

## Enhancements

---

- 1.) Login button name can be changed to Sign in or Submit instead of using Login for the form name and as well as button.
- 2.) "Remember me" checkbox can be added.
- 3.) Forgot username and forgot password can be added
- 4.) writing wrong credentials should show error message saying wrong username
- 5.) password or username recommended to have at least one alphanumeric.
- 6.) Simplify registrations and Allow login via external accounts (i.e. Facebook etc....)
- 7.) Go for email instead of usernames for Login credentials.
- 8.) Require passwords to have at least eight characters, one uppercase letter, one number and one symbol

## Usability Issues

---

1. As a new user I feel confused with Login appear so many times on the screen.
2. I also feel that password field not cleared and secure when I logout.
3. No way to remember password on Login Screen.
4. Mike Albums can be replaced with Mike's Albums to know his collection of Albums.
5. Going back from Album screen page is confusing and can be replaced by Back button.
6. App does not support adjust support phones.

## Bugs

---

1. Every time user login the album keeps on adding with same as well as different users who logged in.
2. Password field is visible it should be masked.
3. Even if user logout I still see logged in password which should be cleared.
4. Password allows more than 10 characters.
5. No error message when Login credentials are wrong.
6. When page increase no scroll bar.
